Titan: General Ledger

Titan General Ledger module provides a powerful, yet easy-to-use combination of online transaction processing and excellent batch-oriented financial controls. Either integrated with other Titan modules, or as a stand-alone system, this system will create financial statements and other management reports for any combination of companies, divisions, products or other structures. It allows users to analyze trends, generate forecasts and budgets, and create their own financial statements without any programming experience.

Feature Summary:
- Improve Information Management
    - Online processing means immediate access to timely and accurate information
    - Built-in financial report writer allows users to create their own library of financial statements without programming
    - Report, analyze and deal with trends resulting from divisional accounting
    - Maintain budgets for three years (current, last and next) and produce comparisons
    - Obtain data for cash flow evaluation and projection Use of exception reports quickly identifies any problems
    - Maintain current books even when last year's books are not closed
- Reduce Audit Expense
    - Use clear audit trails for easy tracking of transaction reports
    - Record the user and terminal used to add, delete or modify all master files
    - Audit trails by individual operators encourage quality data entry

Strong data retrieval capabilities and an integrated tool set add to the power of the application
Utilizes the PROGRESS-4GL RDBMS technology. Source code available.
